

D66 Doetinchem: for the future

D66 Doetinchem's election program is entitled 'For the Future'. With this program we are committed to qualitative growth of the central municipality Doetinchem. If it is up to the team of D66 Doetinchem will be more vibrant, greener and more socially involved.

Bustling central municipality

D66 wants Doetinchem to emerge strong from the corona crisis and will therefore focus on culture: space to explore, going out and events. A city that feels good attracts many people and a higher quality of business. This is how Doetinchem will develop into a vibrant central municipality situated in a beautiful green environment.

5,000 more homes

In order to offer everyone a suitable home, more housing is needed in the municipality. D66 wants to see 5,000 new homes built in the coming years. We will build sustainably: both rental and owner-occupied homes. We shall avoid building in the outlying areas, instead investing in existing neighbourhoods and villages.

The best education and work

Every child deserves equal opportunities. D66 therefore wants better school buildings and cooperation between childcare and primary education. The emphasis is on full integration, strengthening digital skills and fewer low-literate people. D66 wants even more people to use their talents in a suitable job.
